2025 / 2026

An *invitation* into पाषाण काल |

Pasana derives from pāṣāṇa (stone) and āsana (seat), reflecting the coming together of stone and furniture.

A curated collection of works created between 2025–26. Each work is an encounter between material and form, allowing the inherent character of stone to dictate its own narrative. Together, the collection traces a journey from raw material to sculptural object, where nature's permanence meets the language of contemporary design, giving stone a new life through form.

BEND DINING TABLE

A massive boulder presses against the tabletop, forcing stone into an unexpected bend.
